

RGB LED LIGHT BARS

Instruction Manual

Please read the manual carefully before use

How it Works

Smart RGB Light Bar senses rhythm in real-time through built-in MC to sync with music, illuminate full-spectrum RGB LED beads, display dynamic lighting effects and a whole visual-audio feast. Multiple lighting configurations further spice up the atmosphere of various scenes.

Use Operation

1, Control Receiver

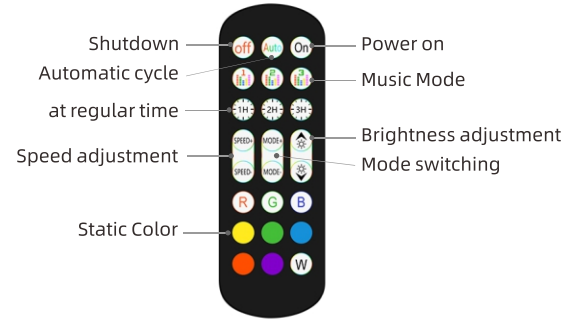

Short press: 16 color switching

Short press: Turn on the machine in the off state, click on static brightness adjustment in the on state, and adjust the speed in the dynamic mode
Long press for 3 seconds: turn off

Short press: switch between 19 attitude modes
Double click: enter/exit music mode,
short press to switch between 4 music mode

2, Remote control (The remote must be aligned with the controller of USB line while use the remote.)

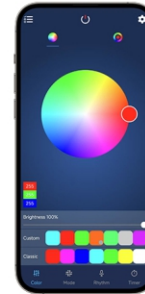

3, App User Interface

1). Scan the QR code to download the app "Raingel", or open App Store, search "Raingel" and download the app.

2). Open Bluetooth, enter the app, click the icon "Raingel", it will enter Bluetooth Control Interface and automatically connect to the device.

Specification
